

COP 1238 series

[RDE Home](#) / [Products](#) / [Rock drills - hydraulic](#) / COP 1238 series

These rock drills have an excellent reputation for high productivity, dependability in operation, and good economy in bench drilling, tunnelling as well as in long-hole drilling. Each version comprises a special combination of rotation motor, impact mechanism and drill steel adapter. Additional benefits include the ability to independently regulate the stroke length, impact energy, rotation speed and flushing effect.

Specification

Weight	150 - 153 kg
Impact power	12 - 18 kW
Impact rate	40 - 105 Hz
Rotation speed	0 - 460 rpm
Max torque	430 - 1000 Nm
Drill steel	R32, T38, T45, OD72, ODEX76
Hole diameters	38 - 115 mm
